C S Rushil & Co., Chartered Accountants · Anna Nagar, Chennai

13 November 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

C S Rushil & Co.'s local search health scores 62/100. The website is strong (on-site local SEO 90/100) and the Google Business Profile is the most complete in its competitive set: correct name, Anna Nagar address and hours, website and booking links, owner replies on every review, 19 photos and the only recent post. It already ranks #1 in the map pack for "chartered accountant anna nagar".

It does not yet reach the map pack for the city-wide search "CA firm in Chennai" because of prominence. It has 57 reviews against 110–726 for the firms that rank, and the visible reviews are 5–6 months old, so recent review velocity is near zero. The firm's old Vadapalani/Ottagapalayam address still appears on YouTube, Justdial and Firm Dhundo, and there is no measurable link footprint.

Search Console's "not indexed" list is not a problem. All 27 URLs you sent are old or trailing-slash addresses that permanently redirect (308) to live, indexable pages in the sitemap; Google reports redirects as "not indexed" by design. No code change is needed.

Category (weight)	Score	Key finding
GBP completeness (25%)	**75/100**	Hours, links, photos, replies done; secondary categories, services, Q&A and description not visible signed out; last post 29 Sep
NAP consistency (20%)	**55/100**	Website = GBP exactly; old address on YouTube, Justdial ×2, Firm Dhundo; duplicate LinkedIn page
On-site local SEO (20%)	**90/100**	Exact-match titles/H1s, LocalBusiness schema, map embed, 12 area pages, all pages indexable
Reviews & reputation (20%)	**45/100**	4.8★ but 57 reviews vs 110–726; latest visible 5 months old; one template-text review
Local content & links (15%)	**35/100**	Deep local content, but no measurable backlinks or local citations beyond a few directories
Weighted total	**62/100**	Prominence (reviews, citations, links) is the gap, not the profile or the site

What this means for "CA firm in Chennai"

Google ranks the map pack on relevance, distance and prominence. Relevance is in place: the primary category is Chartered accountant and the website matches. Distance favours firms near the searcher, which is why the firm ranks #1 in Anna Nagar but not from central Chennai. Prominence is where the gap is. Review count and recency, consistent citations and links decide whether the profile shows beyond about 3 km.

No one can guarantee a position. With steady genuine reviews (10–20 a month), the listing fixes below and secondary categories, a top 3 within about 3 km of Anna Nagar is realistic in 1–3 months, and across central Chennai in 6–12 months.

Signal	Finding	Status

Posts	Last post 29 Sep 2026 (45 days ago). It names a client (ArivuLabs) and offers a "free consultation": ICAI risks (client publicity, inducement). Post weekly from the deadline calendar instead	Needs Attention

Search Console: Not Indexed URLs

Score: 95/100 · Strong

Diagnosis of the 27 URLs you sent

Every URL was fetched live. All return one permanent 308 redirect to a live page that returns 200, has a self-referencing canonical and is in the sitemap. Google lists redirecting URLs under "Page with redirect" (not indexed) on purpose: the destination is what gets indexed. None of these are errors.

Competitive Snapshot (Google Maps, 13 Nov)

Business	Reviews	Photos	Latest post	Map rank "CA firm in Chennai"
C S Rushil & Co.	57 (4.8)	19	29 Sep 2026	Not in first 57 (central view); #5 near Anna Nagar
S Kishore Kumar & Co.	12 (4.8)	6	None	#1 central (proximity)
S. Madhavan & Associates	726 (4.9)	n/a	None	#2 central; #4 near Anna Nagar
Sanjiv Shah & Associates LLP	40 (4.5)	2	None	#3 central
K. Balamurugan CA	35 (4.9)	16	None	#2 near Anna Nagar (keyword in GBP name)
Praveena & Associates	110 (4.9)	16	None	#3 near Anna Nagar (primary: Tax consultant)

Readout: the firm has the most complete profile of the set and trails only on review volume and distance. The leaders are not well maintained (old reviews, no posts, one has no website), so steady reviews and citations close the gap faster than in a well-run market.

Keyword Targeting by Service (SEO, AEO, GEO, GBP)

AEO fix made today: 88 service pages shared the identical heading "What are the key facts?". It now names each page's service (for example "What are the key facts about LLP Registration Service in Chennai?"), so every page has a distinct, snippet-ready question. Committed to the website branch; not live until deployed.

Every service page has one owner keyword. Columns: SEO = the search the page should rank for (plus close variants). AEO = the question-style heading the page already answers (taken from the live page), which is what Google can lift into a snippet or a People Also Ask box. GEO = how a person asks an AI assistant for the same thing. GBP = the Business Profile category the service belongs under; list each service by the same name in the profile's Services section.

Area and city pages (12 Chennai localities, 16 Tamil Nadu cities, 15 income-tax and GST litigation cities) follow the pattern "[service] in [place]" and are listed in seo/KEYWORD-MAP-CHENNAI-ALL-2026-11-13.md.
